"Rosenau" Cottage Circa 1879

This delightful historic two bedroom cottage is built from original sandstock bricks. It has been restored from the ground up with gorgeous new solid red mahogany floors. Its period atmosphere has been retained with the very high ceilings and hand crafted cedar windows.

However there have been some variations from the original with a new kitchen and bathroom and modern comforts like air conditioning and gourmet stove. Natural gas heating and sewer connected.

The cottage is nestled amidst an age appropriate English style cottage garden with outside entertaining area and double garage/teenage retreat with kitchenette and bathroom. Walk to shops and school. If you like the classics don't miss this one.
